Het Shah

+91 7984291743 | shahhets188@gmail.com | lwww.linkedin.com/in/hetshah188 | github.com/hetshah-188 | Ahmedabad, India

Education

Gujarat Technological University (GTU) August 2024 – September 2027
Bachelor of Engineering in Computer Engineering

Bhagwan Mahavir University May 2021 – June 2024
Diploma in Computer Engineering

Technical Skills

Languages: Python, Java, JavaScript, HTML5, CSS3, SQL

Frontend: React.js, Tailwind CSS, Responsive Web Design

Backend: Node.js, Express.js, REST API Design, FastAPI

Databases: MongoDB, MySQL

Cloud & DevOps: Google Cloud Platform (GCP), Git, GitHub, CI/CD pipelines

CS Fundamentals: Data Structures & Algorithms, OOP, System Design, Computer Networks, OS

Developer Tools: VS Code, Antigravity, Jupyter Notebook, Google Colab

Projects

Life4U | *Node.js, JavaScript, MongoDB, React.js, REST API* March 2026 – Present

- Architected a scalable **Blood Bank Management System** supporting four distinct roles (donor, patient, hospital staff, admin) with role-based access control, reducing blood wastage through real-time inventory tracking.
- Engineered **real-time data management** modules for direct booking, streamlined coordination of blood resources, and hospital records, improving operational efficiency by automating manual workflows.
- Designed and implemented **RESTful APIs** for cross-platform data synchronisation between donors, hospitals, and administrators, ensuring high availability and low-latency responses.

FarmAssist — AI-Powered Farming Solution | *Node.js, Python, CSS, Machine Learning* March 2025 – April 2025

- Built an end-to-end **AI-powered web application** enabling farmers to upload plant images for automated disease detection, leveraging computer vision models to deliver real-time diagnostic insights via a smart chatbot.
- Integrated **multilingual NLP support**, live weather prediction APIs, real-time crop market pricing, and NGO geo-mapping to assist data-driven agricultural decision-making.
- Delivered a **full-stack scalable solution** with modular backend architecture and responsive frontend, enhancing accessibility for low-connectivity rural environments.

Justice Lawyer | *JavaScript, CSS, Node.js, MongoDB, REST API* November 2023 – January 2024

- Developed a **full-stack legal services platform** enabling users to search, compare, and connect with lawyers by expertise and location, replacing manual discovery with an intelligent matching algorithm.
- Implemented features including **secure communication channels**, appointment scheduling, user review systems, and integrated payment flows to deliver a seamless end-to-end legal service experience.
- Designed a **responsive admin dashboard** for lawyer data management, featuring dynamic filters, profile management, and real-time analytics visualisations.

Certifications & Achievements

Google Cloud Skills Boost — Multiple Completions 2024
Google Cloud *Ahmedabad, India*

- Completed **Monitoring in Google Cloud**, **App Engine: 3 Ways**, **Build a Website on Google Cloud**, **Google Cloud Diwali in the Arcade**, and **The Arcade Trivia November 2024 Week 1** — demonstrating hands-on proficiency with GCP infrastructure, deployment, and observability tooling.

Smart India Hackathon (SIH) Participant
Government of India National Hackathon

- Selected as a **SIH participant**, solving real-world government problem statements under tight deadlines — demonstrating collaborative problem-solving, agile development, and rapid prototyping skills.
